Cristina Fernández de Kirchner
President, Argentina

It's Time To Pay Your Debts

President Kirchner is probably happy to be in New York City this week — away from the many crises her presidency, and her husband's former administration, have created for Argentina.

Argentina can no longer rely on Hugo Chavez's petrodollars, and remains cut off from capital markets. Lenders worldwide are owed more than \$29 billion including more than \$3 billion to American pensioners, taxpayers and investors — and the costs are rising.

For these problems, we offer one simple solution. Paying Argentina's debts will put the country on the road to recovery, reduce the influence of the dangerous Hugo Chavez, and once again attract foreign investors to Argentina.

Argentina: Get Serious, Honor Your Debts
